Rabbit Brook culvert renewal

MONCTON – The City of Moncton wishes to advise the motoring public of a **lane reduction on Wheeler Boulevard**, between Connaught Avenue and Mapleton Drive, which is set to begin in mid-May and is expected to continue until the end of September, weather permitting.

This section of Wheeler Boulevard will be reduced to one lane in each direction for the duration of the work.

The lane reductions are necessary in order to allow the New Brunswick Department of Transportation and Infrastructure (NB DTI) to renew the existing culverts between Rabbit Brook and Halls Creek that pass under Wheeler Boulevard. This work is being done to increase the hydraulic efficiency of these culverts in order to provide better drainage from Rabbit Brook to Halls Creek.

As a result of the required work, a shelter on the Rabbit Brook Trail near Kendra Street will be permanently removed to accommodate the culvert.

Inquiries about the project can be made to the Department of Transportation and Infrastructure by calling 506-856-2000 or by email at transportation.web@gnb.ca.

The City apologizes for any inconvenience this may cause, and appreciates the patience and cooperation of residents and the motoring public.
